

IPI's Packaging Systems are designed for those businesses interested in affordable on-demand packaging. With an emphasis on ownership, IPI Packaging Systems hold an enhanced value when compared to other costly leasing programs. Three models (450, 1000B, and 1500) provide features to meet your individual packaging needs. These small and easy to operate air pillow machines come with an entry-level price point that doesn't sacrifice quality or output. An IPI Packaging System is one of the most economical packaging solutions available. Each system is capable of producing a variety of pillow sizes in three film thicknesses to meet all your needs. With no need to purchase additional equipment, such as noisy air compressors, IPI Packaging Systems provide a simple "plug and pack" operation that just works. For more information in IPI Packaging Machines visit our website or give us a call today.

Fast...Affordable...Efficient

SMALL BUSINESS

The IPI 450™ air pillow machine is specifically designed for businesses looking for cost savings and operational value in “on-demand” packaging materials. Small and easy to operate the IPI 450™ brings simple, ultra quiet production to your shipping area. With an ROI price point that doesn't sacrifice quality or output, the IPI 450™ is one of the best packaging solutions available.

ENTERPRISE: MULTI-FACET

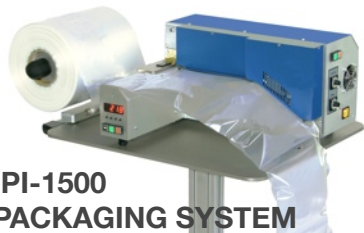

If your operation needs a truly versatile unit due to highly diversified packaging requirements, then this is the unit for you. The IPI 1000B™ is small and easy to operate. The IPI 1000B™ was specifically designed to produce our new wide format film structures: pillow wrap and bubble pillow formats. This unit will produce all our standard pillow sizes up to 8X8 to meet a wide variety of packaging needs. An IPI 1000B™ air pillow machine can provide a wide array of void fill for those special “on-demand” packaging requirement along with the peace of mind of ownership.

ENTERPRISE: LEVEL TWO

The IPI 1500™ is small, quiet and easy to operate. The IPI 1500™ is our fastest unit with the flexibility to meet your most demanding void fill and protective packaging needs. The IPI 1500™ runs at 49 linear feet per minute and can easily handle several packaging stations. This unit runs all pillow sizes from 4X4 up to 16X8 and can also be upgraded to handle the new 16 inch wide structured films to meet the most demanding packaging and fulfillment requirements.
